Jerome Checketts

Full Stack Developer

PROFILE

Software engineer with ability to learn and collaborate in rapidly changing environments and compositions. Worked through 9+ months of both Full Stack and separate Backend bootcamp structure, learning JavaScript, Node.js, React.js, Python, SQL and much more. Eager to tackle web development/design challenges to achieve lasting impacts on user experience.

PROJECTS

OVERTIME ATHLETIC MANAGEMENT

- Collaborated on project with another classmate through use of github and trello.
- Developed front-end components for program interface.
- Altered website to match changes throughout the design with regular updates.
- Created beautiful, functional and responsive designs.
- Verified functioning of pages and applications by testing features after uploads.
- Worked remotely in a peer programming setting on numerous occasions to accomplish the intended result of the project.

HANGMAN

- Designed text-based hangman game in Python.
- Developed game with additional features such as multiplayer option as well as ability for players to choose their own words vs predefined words after initial completion.

EXPERIENCE

Sept 2022 - Present

Nucamp | Remote

FULL STACK DEVELOPER

- Learned different tools, languages and libraries used in the industry.
- Developed customer-facing components on different applications.
- Adapted websites to match changing user preferences and client demands with regular updates.
- Created innovative designs with use of programming languages.
- Verified functioning of pages and applications by testing features after uploads.
